# WALTER RADDUSO
## Frontend Engineer

## ABOUT ME

Frontend Engineer passionate about frontend technologies. From my first encounter with frontend development, it was love at first line of code. Over the years I've refined my skills building visually appealing and user-friendly applications, primarily using ReactJS, NodeJS, JavaScript, and TypeScript. My background spans various programming languages and tools, which has helped me lead teams, collaborate with product managers, and adapt to different environments.

I enjoy keeping up with new technologies and finding ways to apply them in my everyday work.

ReactJS | Javascript | Typescript | NodeJS | NextJS | CSS | SASS | TailwindCSS | HTML | Redux | GraphQL | RestFUL | MongoDB | MySQL | Jest | Git | GitHub | ViteJS | ESLint | Prettier | Firebase | Flutter

## WORK EXPERIENCE

### SR. FRONTEND ENGINEER
Nullplatform — Jan 2025 - Present

Working on the frontend architecture across multiple applications using a micro-frontend approach, with focus on scalability and consistency throughout the platform. Also responsible for developing and maintaining a gateway service that connects frontend modules with backend services. Currently contributing to the integration of AI-powered features to improve the developer experience and build automation tools.

### SR. FRONTEND ENGINEER
Deel — Oct 2023 - Dec 2024

Worked on frontend development projects focused on delivering high-quality user experiences. Participated actively in code reviews, helped implement new features, and collaborated closely with backend teams to improve overall project outcomes.

### SR. FRONTEND SOFTWARE ENGINEER
Mundi — Nov 2022 - Oct 2023

Worked on frontend development projects using modern technologies, collaborating closely with cross-functional teams to ensure smooth integration and alignment with project goals. My responsibilities included performing code reviews, maintaining and optimizing existing projects, implementing new features, collaborating with the backend team, and improving overall performance.

### TECH LEAD FRONTEND
Mercado Libre — Jan 2022 - Nov 2022

Oversaw frontend development for multiple initiatives, using React and NodeJS as core technologies. Took on a versatile role, handling a wide range of tasks across different environments. Kept up with industry trends and emerging technologies to bring fresh ideas into the team.

### SR. FRONTEND SOFTWARE ENGINEER
Mercado Libre — Jan 2021 - Dec 2021

Worked with cross-functional teams to drive frontend development projects and ensure alignment with project goals. Actively participated in code reviews and helped optimize and improve existing projects.

### SSR. FRONTEND SOFTWARE ENGINEER
Mercado Libre — Oct 2019 - Dec 2020

Assisted in the frontend development of different initiatives using React and NodeJS. Adapted to a dynamic role, performing a variety of tasks across multiple environments.

### FRONTEND DEVELOPER
Endeev — Jun 2016 - Oct 2019

Handled frontend development using HTML, CSS, and React. Also developed mobile apps with React Native and contributed to building a RESTful API with NodeJS.

### WEB DEVELOPER
Freelancer / Tecnosan / 1st Outsourcing Choice SRL — May 2011 - Jun 2016

Built WordPress sites, APIs, and user interfaces using PHP, HTML, CSS, and JavaScript through freelance work and while working at Tecnosan and 1st Outsourcing Choice SRL.
